**NOTICE OF MAJOR CULVERT DRAINAGE PROJECT
FALLING CREEK ROAD**

August 20, 2018

Dear Resident:

This letter is to update you of a planned, large scale storm drain repair project in your area, specifically Falling Creek Road in Silver Spring. This project is being managed by the Montgomery County Department of Transportation (MCDOT). During a routine inspection conducted by MCDOT, it was found that the existing 72-inch corrugated metal storm drain pipes, located beneath the roadway and carrying water from the Paint Branch tributary, needed immediate replacement.

The failed pipe section will be replaced with a new corrugated metal pipe. The new infrastructure will also improve the flow of storm water. Given the nature of the work, this project will require the closure of a small section of Falling Creek Drive for an extended period. MCDOT will also need to work with local utilities to relocate their existing infrastructure, which can be a time-consuming process. Weather pending, the project is expected to take **six (6)** months to complete.

Road closure and detour signs, as well as other construction related activities, have already begun in the immediate area of the project. Residents are encouraged to follow the posted detours and a map of the detour is attached on the reverse of this letter.

MCDOT will make every effort to expedite the work to facilitate an accelerated completion. Should you have any questions or comments feel free to contact Mr. Brian Copley, Project Engineer, at 240-777-7227 or brian.copley@montgomerycountymd.gov.

Once again, MCDOT thanks you in advance for your cooperation and apologize for any inconvenience this project may cause.

Sincerely,

Sogand Seirafi
Deputy Division Chief
MCDOT
